Portfolio: In Progress

PROFESSIONAL SUMMARY

Full-Stack Software Engineer with hands-on experience building modern web applications, REST APIs, secure authentication systems, and AI-powered applications. Experienced with React, Next.js, TypeScript, JavaScript, Tailwind CSS, Node.js, Express.js, MongoDB, and MySQL. Through intensive Full-Stack Software Engineering training and independent project development, I have built practical applications including financial management software, AI-assisted task planning systems, and an AI shopping agent. Experienced in API development, authentication, middleware, validation, error handling, file uploads, database integration, deployment, and debugging.
Currently seeking immediate opportunities as a Junior or Entry-Level Full-Stack Software Engineer, Frontend Developer, Backend Developer, or Software Engineer, with a strong focus on continuous learning and solving real-world software problems.

TECHNICAL SKILLS

Frontend Development

- HTML5
- CSS3
- JavaScript
- TypeScript
- React
- React 19
- Next.js
- Next.js App Router
- Tailwind CSS v4
- Responsive Web Development

Backend Development

- Node.js
- Express.js
- REST API Development
- API Validation

- Middleware
- Authentication Middleware
- Error Handling
- File Uploads
- Backend Architecture

Authentication & Security

- JWT Authentication
- bcrypt
- Cookies
- Role-Based Authentication
- Zod Validation

Databases

- MongoDB
- MySQL
- Prisma ORM

AI & AI Application Development

- OpenRouter
- Gemini AI API
- AI Agent Development
- Local LLMs
- LM Studio

Tools & Deployment

- Git
- GitHub
- Postman
- Vercel
- Render

PROJECTS

FinTrack Pro — Full-Stack Financial Management Application

A simple and user-friendly financial management application designed to help users understand their income, expenses, and where their money is going through transaction tracking.

Key Features:

- Income and expense tracking
- Transaction management
- Financial categorization
- User authentication
- Secure JWT-based authentication
- Role-based authentication
- API validation with Zod
- Database integration

- User-friendly interface

Technologies: Next.js, React, TypeScript, Node.js, Express.js, MongoDB, JWT, bcrypt, Zod

TaskFlow 5d — AI-Powered Task Planning Application

An AI-powered task planning application that allows users to provide their tasks and goals, after which AI generates an organized plan based on the user's requirements.

Key Features:

- AI-assisted task planning
- User task and goal input
- Automated planning
- AI-powered workflow
- Practical task organization

Technologies: Gemini AI API, Prisma

AI Shopping Agent — Personal AI Price-Finding Project

An ongoing AI agent project designed to help users find and compare online product prices instead of manually searching across multiple websites.

Key Concept:

- User provides a product they want to find
- AI searches for relevant options
- Products and prices can be compared
- The system is designed to help identify lower-priced purchasing options

Technologies: OpenRouter, AI/LLM technologies
Status: Ongoing

EDUCATION

Jamhuriya University Of Science and technology

Computer and IT — Data Science & Artificial Intelligence
Started: October 2026

PROFESSIONAL TRAINING

Dugsiiye

Full-Stack Software Engineer Program
November 2025 – Present

Intensive hands-on training focused on modern full-stack software development, including frontend development, backend development, APIs, databases, authentication, deployment, debugging, and application development.

Status: Currently completing the program.

ADDITIONAL TECHNICAL EXPERIENCE

- Built and deployed full-stack applications using modern JavaScript technologies.
- Deployed frontend applications using Vercel.
- Deployed backend applications using Render.
- Developed REST APIs with authentication, validation, middleware, error handling, and file uploads.
- Worked with both SQL and NoSQL databases.
- Built AI-powered applications using external AI APIs.
- Experimented with local LLMs using LM Studio.
- Developed AI agent concepts for practical real-world use cases.
- Experienced in debugging and solving software development problems.
- Continuously learning and expanding software engineering skills.

CORE STRENGTHS

- Problem Solving
- Backend Architecture
- Fast Learning
- Debugging
- Clean Code
- API Development
- Full-Stack Development
- Continuous Learning

LANGUAGES

- **Somali:** Native
- **English:** Intermediate

CAREER OBJECTIVE

Seeking an immediate opportunity to contribute as a Full-Stack Software Engineer, Frontend Developer, Backend Developer, or Software Engineer while continuing to grow through real-world engineering experience and challenging software projects.
